### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: Claims 1-6, 8-25, 27-40, 42-76, 86, 89 and 90 are indicated as allowed because all of these claims now are drawn to normalization/subtraction methods in which there is a step that removes non-specifically hybridized polynucleotide drivers. The prior art of Carninci and Chang teach normalization and subtraction methods, but does not teach specific removal of non-specifically hybridized nucleic acid drivers. Claim 56 expressly incorporates this step as step (e) while the other independent claims indicate removal of "non-specifically hybridized nucleic acid drivers". While Carninci teaches the use of RNase to degrade non-hybridized RNA, there is no legally sound motivation to combine Carninci with the subtraction/normalization methods of Chang for the purpose of removing the non-specifically hybridized nucleic acid drivers. While these references are combinable to use RNase to create full length mRNAs, the use of the method to remove non-specifically hybridized nucleic acid drivers represents an unexpected result which overcomes the prima facie case of obviousness that was constructed relying upon reordering of the steps.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
